SECTIO A

1994

Annales Universitatis Mariae Curie - Skłodowska Sectio A Mathematics is published by the Editorial Office of the university and endeavors to publish significant research papers in some selected areas of mathematics complying with scientific interest of our faculty, i.e. complex analysis, differential equations, differential geometry, functional analysis, probability. One volume of 150–200 pages is published each year.

To submit a paper for publication, an author should send two copies of the manuscript to the following address:

Redakcja Annales UMCS Sectio A (Mathematica)

Plac M. Curie-Skłodowskiej 5

20-031 Lublin, Poland.

The submission of a paper implies the author's assurance that it has not been published, or submitted for publication elsewhere. Preference will be given to manuscripts no longer than 30 pages written in Te_X, possibly in English. Authors of published papers will receive 25 offprints. Manuscripts submitted for publication should be neatly typed on one side of the page only, double spaced, with generous margins. Diagrams should be drawn with black India ink on separate sheets of glossy white paper and be submitted for photographic reproduction. References should be in alphabetic-chronological order, abbreviations of names of journals and references to books should follow the standard form established by Mathematical Reviews. After the referee's approval, the authors of papers written in Te_X will be requested to submit the diskette.
