

Preface

This volume contains the addresses delivered at the Workshop on Complex Analysis that was held June 8–9, 1994, at the Institute of Mathematics, Maria Curie - Skłodowska University in Lublin.

Besides these addresses, some papers were included whose authors planned to give a talk but could not do it because of various reasons.

The Workshop took place on the occasion of celebrating the 50-th anniversary of the University.

The idea and organization of the Workshop are due to Dr Jan Szy-
nal who was helped by some colleagues. On behalf of the participants
of the Workshop sincere thanks to the organizers are expressed by

The Editors
