ANNALES
UNIVERSITATIS MARIAE CURIE-SKŁODOWSKA
LUBLIN – POLONIA

VOL. LXXII, NO. 2

SECTIO A

2018

Annales Universitatis Mariae Curie-Skłodowska Sectio A (Mathematica) is published by the Maria Curie-Skłodowska University Press and endeavours to publish significant research papers in pure and applied mathematics. Contributed papers should be written in English (in rare cases exceptions may be considered). One volume consisting of two issues is published each year.

The submission of a paper implies author's assurance that it has not been published, or submitted for publication elsewhere and that if accepted it will not be published elsewhere in the same form, in English or in any other language, without the written consent of the publisher. Preference will be given to manuscripts not longer than 30 pages. Manuscripts should be submitted electronically, by sending a PDF file to

bsprus@hektor.umcs.lublin.pl

or via the webpage

<https://journals.umcs.pl/a>

Authorship should include all those and only those persons who have made significant contribution to the research presented in the paper. If there are others who have participated in certain substantive aspects of the research project, they should be acknowledged as contributors. Each paper should include a short abstract. The abstract should be self-contained, so any references to numbered items in the paper should be avoided. Authors should also include key words and one or more subject classification codes according to the American Mathematical Society classification system. References should be in alphabetical-chronological order, abbreviations of names of journals and references to books should follow the standard form established by Mathematical Reviews. Upon acceptance, the authors will be requested to send the \TeX files.

Further information concerning this journal and the recent volumes can be obtained under Internet address

<https://journals.umcs.pl/a>

Volumes published in 2000–2009 are available at

<http://math.umcs.lublin.pl/annales/>

The on-line version of the journal is the primary one.

Table of contents

1. ZBIGNIEW A. ŁAGODOWSKI	
On the necessary condition for Baum–Katz type theorem for non-identically distributed and negatively dependent random fields	1
2. HALINA BIELAK and KAMIL POWROŹNIK	
The density Turán problem for 3-uniform linear hypertrees. An efficient testing algorithm	9
3. DOROTA BRÓD	
On a two-parameter generalization of Jacobsthal numbers and its graph interpretation	21
4. MIROSLAV DOUPOVEC, JAN KUREK and WŁODZIMIERZ M. MIKULSKI	
On the Courant bracket on couples of vector fields and p -forms	29
5. JAN KUREK and WŁODZIMIERZ M. MIKULSKI	
On the existence of connections with a prescribed skew-symmetric Ricci tensor	37
6. ŁUKASZ PIASECKI	
On ℓ_1 -preduals distant by 1	41
7. PAWEŁ SOBOLEWSKI	
Products of Toeplitz and Hankel operators on the Bergman space in the polydisk	57
8. MARIUSZ SZCZEPANIK	
Generalized trend constants of Lipschitz mappings	71
